Suggestions for improvement, if any	
More funds for research	
For a faculty from a department where teaching requires writing on the board for the whole 45 minute lecture, if additional boards can be provided instead of the single board provided presently, it will be of immense help.	
Everything is possible on when infrastructure development will be there	
To increase manpower for more engagement in research-related activities	
24/7 internet facility	
Faculty development is one aspect the institution is focusing on improving. In the process it should also ensure that the college is doing enough for the all round development of the students as well.	
Incentives from the govt to encourage the teachers.	
More provisions should be provided for extension services.	
Need to focus more on co curricular activities for the students.	
Fundings required for research	
Accountability, Camaraderie and We - feeling needs to be encouraged!	
Adequate	
Need better washrooms	
Financial Assistance for research	
More funds needed to organise extension services.	
Scope for research	
A centralised common Instrumentation centre and uninterrupted power supply for Science Block would be helpful for lectures and practicals.	

Team Work.	
Non-teaching staffs should do their respective work so that the teachers will have more time to focus on research	
Funding for Research and Development from the Higher Education department will encourage many teachers to take up research activities.	
The teachers should be given more space and time for reading and research instead of being overburdened with administrative and clerical activities. The college administration should engage the clerical staff to fulfill their responsibilities and lighten the workload of the teachers.	
<p>1. A "Modular routine" may be developed for need based (flexible) students activities (sports, NCC/NSS, field trip, project etc.). It may also bring some respite to infrastructure shortage (classroom, bus etc.)!</p> <p>2. Enrollment to practical subjects (i.e. Geography) should not exceed than optimum number (according to infrastructure and faculty strength). The number (departmental intake capacity) should be clearly indicated in the college prospectus.</p> <p>3. Internship system should be introduced (explain not necessary!).</p>	
More classroom	

Conclusion:

1. The respondents were mostly satisfied with the given CBCS curriculum, though there were a few who considered it to be too vast for completion within a semester.
2. The respondents do not have much freedom to modify the course content of the syllabus since it is only an affiliated college.
3. The respondents suggested funding/financial support by the institution for research activities of the teachers.
4. On infrastructure, most of the respondents commented on the need for more classrooms.

Action Taken:

1. One of the outcomes of the feedback received from teachers was that a Policy on Providing Financial Support to Teachers to Attend or Participate in Conferences/Workshops/Publication in UGC CARE list was envisaged and put in place.
