

STUDENT ASSESSMENT OF TEACHERS 2019-20

FEEDBACK ANALYSIS

The assessment was done for the 2019-20 batch of students by emailing a google form to all students. They were asked to give their opinion of each of their teachers completely anonymously and the reports were extracted Department-wise so the figures reported below are for each department as a unit. Overall, the survey shows that the students are satisfied with their teacher's performance and have a favourable opinion of their teachers though a few have expressed negative opinions. This is to be expected in any survey. The responses for each individual teacher was also shared with the concerned teacher.

For most departments, the responses are identical, on the average except for the use of LCD projectors in the classroom, Not all classrooms had projectors so these have been reflected in the answers.
